# preface

The *Tasmanian Pocket Year Book* is compiled to provide concise, useful and accurate information about Tasmania.

ABS gratefully acknowledges the assistance and contributions of State Government departments and other agencies.

The Tasmanian Office of the ABS has further extensive information about our localities, all States and Australia. This information is available in statistical form in publications, on disk or as part of a tailored consultancy service.

Vince Lazzaro
Acting Regional Director, Tasmania

Australian Bureau of Statistics Hobart, June 1999

# chronology

Aboriginal people first settled Tasmania when it was connected to the Australian mainland by a land bridge, the Bass Plain, over 35,000 years ago.

- 1642 Abel Tasman landed on the east coast naming his discovery Van Diemen's Land.
- 1772 Marion Du Fresne landed at Marion Bay.
- 1777 James Cook anchored in Adventure Bay.
- 1788 William Bligh anchored in Adventure Bay.
- 1798 Bass and Flinders circumnavigated Van Diemen's Land.
- 1803 First settlement at Risdon Cove by John Bowen.
- 1804 Sullivan's Cove settled by David Collins.
- 1806 Settlers moved from York Town to Launceston
- 1816 First issue of Hobart Town Gazette circulated.
- 1822 Penal settlement established at Macquarie Harbour.
- 1828 Martial law proclaimed against Aborigines.
- 1829 First settlement at Emu Bay (Burnie).
- 1830 Beginning of the 'Black Line' to round up Aborigines. Penal settlement of Port Arthur established.
- 1832 Maria Island closed as a penal settlement.
- 1833 Macquarie Harbour penal settlement closed.
- 1835 Van Diemen's Land divided into counties and parishes.
- 1842 Hobart made a city. Peak year for convict arrivals (5,329).
- 1853 Arrivals of last transported convicts.
- 1854 Passage of a Bill establishing responsible government.
- 1856 Name of Van Diemen's Land changed to Tasmania. Opening of new bi-cameral parliament with W.T.N. Champ as Tasmania's first Premier.
- 1868 Compulsory primary education.
- 1876 Main Line Railway opened for traffic.
- 1877 Port Arthur closed as a penal settlement.
- 1880 First telephone operated in Tasmania.
- 1892 Mount Lyell Mining Co. established.

- 1901 Proclamation of the Commonwealth. First elections held for Senate and House of Representatives. Population 172,475.
- 1905 First experiments in wireless telegraphy between Tasmania and the mainland.
- 1909 State's first Labor Government under John Earle.
- 1912 Disastrous fire at North Lyell mine, Queenstown.
- 1914 First aeroplane flight in Tasmania. Departure of first Tasmanian contingent to fight in Great War. Formation of Hydro-Electric Department.
- 1917 Establishment of Electrolytic Zinc Co. at Risdon and a carbide works at Snug.
- 1921 Population 213,780 (Census).
- 1922 Completion of Waddamana power station.
- 1924 First superphosphate manufactured by Electrolytic Zinc Co. at Risdon.
- 1929 Beginning of economic depression. Serious floods throughout the State.
- 1930 Export prices fell to half the 1928 level.
- 1932 Tasmanian, Joseph Lyons was sworn in as Prime Minister.
- 1934 Beginning of 35 years of continuous Labor Government with the election of the A.G. Ogilvie Ministry.
- 1936 Tasmania linked with Victoria by submarine
- 1938 Paper mill using native hardwoods established at Burnie.
- 1939 Outbreak of World War II. Prime Minister Lyons died in office.
- 1940 Tasmanians sailed for Middle East with Australian 6th, 7th and 9th Divisions.
- 1941 Newsprint production began at Boyer. Tasmanians sailed for Malaya with Australian 8th Division.
- 1947 'Displaced persons' began to arrive from Europe. Population 257,078 (Census).
- 1948 Forty-hour week awarded to most workers.
- 1954 Foundation of the Metropolitan Transport Trust.
- 1955 Comalco aluminium plant at Bell Bay officially opened.
- 1959 *Princess of Tasmania* commenced roll-on roll-off ferry service, Melbourne to Devonport.
- 1960 Inland Fisheries Commission created. First Tasmanian television broadcast.
- 1964 Tasman Bridge opened. Hobart's water supply fluoridated.

- 1966 Decimal currency introduced. STD (Subscriber Trunk Dialling) introduced.
- 1967 On 7 February, bushfires in Southern Tasmania resulted in 62 deaths, over 1,000 houses destroyed, total property damage over \$25m.
- 1968 Capital punishment abolished.
- 1969 Centre Party-Liberal coalition government. Full bench of Federal Arbitration Commission granted equal pay to females performing equal work. Copper smelter at Mount Lyell closed.
- 1970 Introduction of daylight saving.
- 1971 APPM Ltd Wesley Vale paper plant opened. Population 390.413 (Census).
- 1973 The first legal casino in Australia, Wrest Point, officially opened. The \$121m Mersey-Forth HEC scheme officially opened.
- 1974 Workers under State Wages Board's awards granted four-weeks annual leave. Women under State Wages Board's determinations awarded equal pay. Gordon Dam completed.
- 1975 The Australian National Line ore carrier, *Lake Illawarra*, collided with the Tasman Bridge. Hotels allowed to open for Sunday trading.
- 1976 Sea cargo to and from Tasmania subsidised.
- 1977 Commonwealth Government confirmed Kingston as the site of Australia's new Antarctic Division Headquarters. Tasman Bridge re-opened.
- 1978 Tasmanian Railways came under full control of the Australian National Railways Commission. All regular passenger train services ceased.
- 1979 HEC released a report which recommended a \$1,360m power development scheme involving the Lower Gordon, Franklin and King rivers.
- 1981 A referendum supported the HEC power development Gordon-below-Franklin scheme. The Premier, Doug Lowe, deposed.
- 1982 The Liberal Party formed government in its own right for the first time in Tasmania. The World Heritage Commission listed Tasmania's South-West Wilderness Area. Despite the listing, the State Government commenced the Gordon-below-Franklin scheme.
- 1983 The Commonwealth Labor Govt intervened to stop the Gordon-below-Franklin Dam.
- 1986 The State Liberal Govt won a second term.
- 1987 The Commonwealth Govt's Helsham Inquiry was established to decide if the Lemonthyme and Southern forests were of World Heritage value.

- 1988 The Tasmanian Govt agreed to protect 80% of the Helsham Inquiry area, the Lemonthyme and Southern forest; the Commonwealth Govt agreed not to pursue World Heritage Listing and offered \$40m compensation.
- 1989 The State election resulted in a Labour-Green Accord
- 1990 The World Rowing Championships were held at Lake Barrington.
- 1991 A 100 km/h maximum speed limit introduced for Tasmanian roads. Population 452,834 (Census).
- 1992 The Liberal Party won office in Tasmania.
- 1993 The number of local government councils was reduced from 46 to 29. Unemployment reached 13.4%.
- 1994 Local Govt elections in 18 councils were held by postal ballot. The Morling Report recommended no reduction in the number of members of the House of Assembly or Legislative Council.
- 1995 All-day Saturday shop trading was introduced. The bulk ore-carrier *Iron Baron* grounded off the mouth of the Tamar River. Unemployment fell to 10%. European Carp discovered in lakes Crescent and Sorell.
- 1996 On 28 April, 35 persons were killed and 21 persons were injured when a gunman fired at visitors, staff and residents in the Port Arthur area. The *Firearms Act 1996* provides for the possession, use, registration and licensing of firearms in Tasmania. Commonwealth-State inquiry into Tasmania's economy (Nixon Report). Tasmania's population from Census 1996 was 459,659.
- 1997 Tasmanian population begins to decline in number. The Local Government Board undertakes a controversial review of council boundaries. Regional Forest Agreement is signed. Hobart Aquatic Centre opens.
- 1998 Parliamentary reform sees reduction in number of House of Assembly members from 35 to 25. Legislative Council will reduce from 19 to 15 members over next 3 years. The Labor party won office in Tasmania.
- 1999 \$20.5m Federation Funding is approved to re-build the 34km ABT Wilderness Railway which runs from Queenstown to Regatta Point, near Strahan. Ansett Australia announced that it intends to hand responsibility for its Tasmanian operations to its subsidiary, Kendall Airlines.

# Tasmania in brief

The State of Tasmania is a group of islands lying south of the the south-east corner of the Australian mainland.

The area of the State, including the smaller islands, is 68,114 km<sup>2</sup> or about 0.9% of the total area of Australia. It is separated from the mainland by Bass Strait, a shallow body of water with an average width of 240 kilometres. The remaining coastline is bounded by the Southern Ocean on the south and west and the Tasman Sea on the east. At its greatest length, Tasmania spans some 296 kilometres from north to south; at its greatest width, it is 315 kilometres from the eastern coast to the western coast.

# CITIES

### Hobart

Hobart, Tasmania's capital city, is in the south of the State, 20 kilometres from the mouth of the Derwent River. The city extends over both sides of the river, the western extent being bounded by Mount Wellington (1,269 metres).

It is the second oldest city in Australia, having been founded in 1804. There are many examples of early colonial architecture in Hobart, such as Australia's oldest theatre, the Theatre Royal, built in 1837 and still in use today. The growth of the city accelerated in the mid-nineteenth century as Hobart became a major whaling port and important ship-building centre. Today, its modern deepwater port can handle the largest ships, and there is a modern container terminal. Hobart has become a popular port for visiting luxury cruising ships.

Attractions around Hobart include the beautiful Botanical Gardens featuring a wide range of native and introduced flora; the Derwent River and surrounding beaches, which provide many recreational activities; Constitution

Dock, which plays host to hundreds of sailors who compete in the Sydney to Hobart and Westcoaster yacht races during the Christmas-New Year period; and Australia's first legal casino, Wrest Point.

### Launceston

Launceston is situated at the head of the Tamar River at the confluence of the South and North Esk rivers. It was settled in 1806 and is Australia's third oldest city. It has many historical buildings and places of interest. The Queen Victoria Museum and Art Gallery houses a notable collection of historical and contemporary artwork.

Launceston possesses some attractive parks and gardens dating from the Victorian and Edwardian eras. The City Park, Princes Square and the Gorge Reserve have some fine examples of the architecture of these periods.

# Glenorchy

The City of Glenorchy is Tasmania's fourth largest city. It lies on the west bank of the Derwent River, north of Hobart.

A wide range of industry gives the city a diverse economic base from metal refining and fabrication to textiles, footwear, glassware and confectionary.

# Devonport

Devonport is situated between the Mersey and Forth Rivers on Tasmania's North-West coast. Formed in 1980 when the two towns of Formby and Torquay combined, Devonport was declared a city in 1981. As home port for the Bass Strait vehicular ferry service, the city is commonly referred to as the "Gateway to Tasmania".

## Burnie

Burnie became Tasmania's fifth city in 1988. Situated on Emu Bay, the Port of Burnie is Tasmania's largest port.

Burnie is the regional centre for the North West/West Coast areas of Tasmania and Burnie has many significant attractions including several waterfalls.

# Clarence

The City of Clarence is located on the eastern shores of the River Derwent. It includes the historic townships of Richmond, Cambridge, Rokeby and Bellerive and Risdon Cove, the site of the first European settlement in Tasmania. Its industries include tourism, agriculture, acquaculture, viticulture and manufacturing.

# REGIONS

### South

Southern Tasmania is dotted with historic townships, for example, Richmond, New Norfolk and Hamilton, all of which retain enough of their original features to allow the visitor a glimpse of the conditions under which the early settlers existed. Richmond in particular remains a model example of the early penal outstation, with its gaol, renowned bridge and churches.

The rugged coastline and rock formations of the Tasman Peninsula provide spectacular scenery for travellers on the road from Hobart to Port Arthur, a former penal settlement. The remaining convict buildings include the impressive remains of the never-consecrated church, and the model prison and penitentiary, which portray the severity of the Tasmanian convict era.

Orchard fruit, mainly apples and pears, as well as berry fruit, are grown in the south for both local consumption and export chiefly to Asian markets.

Industries in the southern area include the Cadbury Schweppes cocoa and confectionery factory at Claremont, Pasminco Metals-EZ at Risdon, Fletcher Challenge Paper at Boyer, Textile Industries Australia, Blundstone footwear, Incat and the Cascade Brewery, established in

1824, the oldest brewery still in operation in Australia.

### Fast Coast

A popular holiday destination, the East Coast features miles of white beaches with excellent surf, as well as many other places of interest. Freycinet Peninsula, the Blow Hole at Bicheno and Maria Island are all easily accessible to tourists.

A variety of fishing activities is based in the ports of St Helens and Bicheno. Catches include crayfish (Southern Rock Lobster) and abalone.

## North-East

The rich soil of this area provides good land for farming, an activity important to the State's economy. Beef and dairy cattle, wool sheep and prime lambs are run here. Vegetables, grown mainly for processing, are a significant component of the region's agriculture. A wide variety of crops is grown, and the Department of Defence has an experimental establishment in Scottsdale to investigate ways of processing and packaging produce for use by troops in the field. Hop growing is also an important commercial activity.

### North

Northern Tasmania's varied attractions include the lavender farm at Nabowla, the gold mine ruins at Beaconsfield, the Ben Lomond ski fields and the colonial villages of Evandale and Hadspen.

Entally House, at Hadspen, and Clarendon, at Nile, are two of the finest restored homesteads in Australia. A number of vineyards have been established in recent years at Pipers Brook and along the banks of the Tamar River.

Industries include the aluminium smelter and refinery Comalco, at George Town, the alloy producer BHP TEMCO and J.Boag & Son Brewing (Launceston). Woodchip production and timber processing are also important.

# North-West

The fertile, deep red volcanic loams and lush pastures of this region are ideal for vegetable growing and dairy farming. Vegetable processing factories (Simplot and McCain Foods) and milk processing factories (United Milk Tasmania and Lactos cheesemakers) were established on the coast to process the large quantities of vegetables and milk produced. Some farmers engage in pig and sheep farming and others have turned to poppy farming to provide oil for pharmaceutical preparations.

Manufacturing is dominated by forest-based industries with Australian Paper Tasmania, which has mills at Burnie and Wesley Vale, producing a major share of Australia's fine printing and writing papers, magazine papers and coated papers. Cement is produced at Railton. At Devonport there are Australian Weaving Mills and Tascot Templeton Carpets.

Beaches at Boat Harbour, Ulverstone and Port Sorell, as well as Sisters and Turners Beaches, are ideal holiday spots and surfing beaches. The historical village of Stanley is noted for its unusual geographical feature, The Nut. The Lake Barrington rowing course, of international standard, is a popular recreational asset.

### West

Dense forests and lofty mountain ranges are typical of this rugged region, with windswept beaches, wild rivers and moonscape hills making the west vastly different from any other Tasmanian region.

Strahan, on Macquarie Harbour, is the starting point for cruises to the Gordon River, which winds deep into the dense forests of the South-West.

Mining is the predominant industry of this area, with zinc being mined at Rosebery, tin at Renison Bell and copper at Mt Lyell.

### South-West

Much of this isolated region is inaccessible and uninhabited. It contains spectacular scenery and the Tasmanian Wilderness World Heritage Area has been listed by the World Heritage Commission. Dense rainforest, horizontal scrub, wild rivers, rapids and ravines, unpredictable weather, walking tracks and rugged mountains can be tackled only by experienced bushwalkers. Chalets and cabins have been erected in the more accessible areas to cater for bushwalkers.

### Central Lakes Area

In this mountainous area many rivers have been harnessed and new lakes created to produce electricity for the State's power grid. Trout-fishing is popular in the area and many record catches have been reported.

# Midlands

Early pioneers surveyed a road through the Midlands to link Hobart and Launceston; today, the road provides a comfortable 2-2½ hour journey between the two cities.

Sheep farming mainly for wool, is the principal agricultural activity of the region, with some beef cattle grazing also being undertaken. Throughout the Midlands there are historical villages with old roadside inns, cottages and churches. The most notable towns are Oatlands, Tunbridge, Ross and Campbell Town.

# King and Flinders Islands

Situated in Bass Strait, these islands are rich in marine life (e.g. crayfish, abalone, mullet and salmon) and bird life (e.g. muttonbird, duck, quail and pheasant) and have prosperous beef and dairy industries. The unpredictable weather and vicious storms often experienced in Bass Strait have resulted in many ships being lost in the area. King Island is virtually ringed by shipwrecks.

# national parks & other reserves

Ten reserve categories are provided for under the *National Parks and Wildlife Act 1970*:

- 1. National Parks are large natural areas of land containing representative or outstanding examples of natural regions, features or scenery. They are managed to protect and maintain the conservation values of the area and provide for ecologically sustainable recreation.
- 2. State Reserves have either significant natural landscapes, natural features, or sites, objects or places of significance to Aborigines.
- 3. Nature Reserves have natural values which contribute to natural biological diversity and are unique, important or have representative values.
- **4. Game Reserves** have unique, important or representative natural values, and are used for the ecologically sustainable hunting of game.
- 5. Conservation Areas are managed to protect and maintain the natural and cultural values of the area, and the sustainable use of the resources of the land.
- **6. Nature Recreation Areas** are managed for public recreation and education while conserving the natural and cultural values of the land.
- 7. Regional Reserves are managed to allow mineral exploration and mining and other small scale uses whilst protecting the conservation values of the land.
- 8. Historic Sites are siginificant for historic cultural heritage and are managed to conserve historic features.
- **9. Private Sanctuaries** are managed to protect their natural or cultural values whilst allowing the owner to undertake activities consistent with conserving those values.
- 10. Private Nature Reserves are privately owned areas similar to private sanctuaries but have more significant values.

# world heritage area

The Tasmanian Wilderness World Heritage Area, which comprises about 20% of the State (1,383,865 hectares), is essentially wild, natural country in central and south-western Tasmania. It was jointly nominated for World Heritage Listing by the Commonwealth and State Governments in September 1989 and inscribed on the World Heritage List by the World Heritage Committee of UNESCO in December 1989.

Within the World Heritage Area are rare and ancient plants, very tall eucalypt forests, distinctive and uncommon animals, important alpine and sub-alpine areas, karst and glacial features and scenery of sweeping grandeur and intimate beauty. There are also extensive cave systems, ice age Aboriginal cave-art sites and sites of European cultural significance.

# flora

Tasmania's climate is generally conducive to the development of forests. In the higher rainfall areas of the central highlands and the west, rainforest predominates, although treeless habitats are frequent on water-logged soils and frost hollows. This is in contrast with the drier, more open eucalypt forests of the east. Exposed mountain summits contain treeless areas of alpine moorland, heath and bog, with alpine plants resistant to heavy frosts, waterlogging, snow and cold winds.

Of the 1,600 or so flowering plants native to Tasmania about 320 are unique (endemic) to Tasmania. Many of the endemic species are found in Tasmania's rich alpine flora (where up to 40% of the flora is endemic). Rainforests are another haven for Tasmania's endemic species. However, overall, Tasmania's flora is closely related to that of mainland Australia.

Links with the ancient floras of the southern continents are also evident in Tasmania's flora. For example, the southern beeches (*Nothofagus* spp.) are still present as scattered forests in Australasia and South America. In Tasmania, Myrtle Beech is a dominant rainforest tree and Deciduous Beech is a subalpine shrub. Beech fossil pollen records in these areas and in Antarctica extend back to the age of the dinosaurs. Other plants with affinities to southern continents include heaths, Leatherwood, Tasmanian Native Laurel, Bauera and Horizontal Scrub. Tasmania has no endemic plant families.

Characteristic Tasmanian plants include:

 Button Grass, which grows extensively on wet infertile peats, mainly in the west and south of the State. Button Grass is a tussock-like sedge with conspicuous, spherical fruiting-heads on long stems;

- native conifers, present within rainforest and alpine communities that have not been burnt. King Billy Pines and Pencil Pines occasionally also form forests up to 30 metres in height in elevated valleys and on subalpine plateaux respectively. They can reach ages of over 1,000 years;
- Horizontal, a rainforest plant with an unusual growth form. While these trees sometimes grow erect to a height of 15 metres or more, typically slender saplings 8-9 metres high arch back towards the ground. Many erect branches arise from an almost horizontal trunk and these in turn bend over, interlacing with each other and with branches of adjacent trees. In this way dense and springy platforms form, often at a considerable height above the ground; and
- cushion plants, which are common in Tasmanian alpine vegetation. Tasmania has five species of woody shrubs that form compact mounds: Pterygopappus lawrencii; Donatia novae-zelandiae; Dracophyllum minimum: Phyllachne colensoi: Abrotanella forsterioides. This plant community closely resembles those found in comparable habitats in New Zealand and South America. The species of Donatia and of Phyllachne are common to Tasmania and New Zealand. As the cushion plants grow, they form a mosaic which has a continuous surface. These plants serve as seed beds for others: the white-flowered Sundew is often conspicuous and the endemic plaintain, Plantago gunnii, is confined to this habitat. However, a cushion plant does not continue to expand indefinitely; after a time it dies in the centre allowing the establishment of other plants.

# fauna

The separation of Tasmania from the Australian mainland after the last Ice Age, some 12,000 years ago, has allowed the Tasmanian fauna to evolve in isolation and has protected it from threats, such as foxes and dingoes, that have contributed to the extinction of species on mainland Australia. Many species such as the Green Rosella, Golden Galaxias, Pedra Branca Skink and Moss Froglet evolved in Tasmania. Some such as the Bettong, Eastern Ouoll and Pademelon are now restricted to Tasmania after disappearing within the last 100 years from southeastern Australia. Others, for example the Eastern Barred Bandicoot, Spotted-tailed Quoll and Ground Parrot, are under threat on the mainland but are relatively secure in Tasmania.

### Mammals

Tasmania has 35 species of native terrestrial mammals, of which two are monotremes (Echidna and Platypus), 19 are marsupials (wallabies, wombats, devils etc.) and 14 are eutherians (rodents and bats). Six species and 14 subspecies are endemic to the island State; hence nearly 60% of terrestrial mammals are uniquely Tasmanian. Two species, the Thylacine (probably extinct) and the New Holland Mouse (rare), are listed in Tasmania's *Threatened Species Protection Act* 1995. The remaining species are relatively secure in Tasmania.

### Birds

There are 256 species of non-marine birds and 74 marine birds recorded from Tasmania. One of these, the Short-tailed Shearwater is Australia's most abundant seabird. Twelve of these species are endemic, such as the Dusky Robin, Black Currawong, Yellow Wattlebird (world's largest honeyeater) and the Tasmanian Native Hen (one of Australia's few flightless birds). There are 25 endemic subspecies. A total

of 25 species are listed as threatened including the Orange-bellied Parrot, Forty-spotted Pardalote and the Wandering Albatross. One species, the King Island Emu, and three subspecies, the Tasmanian Emu, the Macquarie Island Buff-banded Rail and the Macquarie Island Parakeet are extinct.

# Reptiles

Tasmania has 21 species of native terrestrial reptiles of which 3 are snakes (all venomous) and the remainder lizards. Six lizards are endemic including 3 alpine snow skinks.

# **Amphibians**

Tasmania has 11 native species of amphibians of which 3 are endemic species. They are the Tasmanian Froglet, the Tasmanian Tree Frog and the recently discovered Moss Froglet.

# Fish

Tasmania has 44 species of native freshwater fish and in excess of 500 species of marine fish. Of the freshwater fish, 17 species are endemic most of which belong to the family Galaxiidae. Tasmania is recognised as the centre of diversity for present day galaxiids. Endemic species include the Golden Galaxias, the Swamp Galaxias and Tasmanian Mudfish. Six species are listed as threatened including the Pedder Galaxias, arguably Australia's most endangered fish species. Other threatened species include the Swan Galaxias, the Clarence Galaxias, the Saddled Galaxias and the Spotted Handfish.

### **Invertebrates**

There are thousands of invertebrate species in Tasmania. Endemism is high in rain forests, caves and alpine environments, and also among forest litter and freshwater habitats. The Tasmanian invertebrate fauna is rich in primitive groups of world heritage significance.

# climate

### **TEMPERATURE**

Tasmania enjoys for the most part a 'temperate maritime' climate. The normal daily temperature range close to the coast is around 7°C but can be double that inland. The highest temperature recorded in the State is 40.8°C, at Hobart in January 1976 and Bushy Park in December 1945. The lowest temperature on record is -13.0°C at Tarraleah, Butlers Gorge and Shannon in June 1983.

### RAINFALL

The interaction of airstream and topography is the main factor governing rainfall in Tasmania, and this causes a marked variation in rainfall across the State. Annual averages are less than 600mm in the Midlands, around 800mm on the North-west Coast, 1500mm in the North-east Highlands and also on the west coastal strip, but over 3500mm in some parts of the mountainous west. Rainfall is less reliable over the eastern half of the State than the west.

### WIND

The mid-latitude westerlies, the 'Roaring Forties', affect Tasmania directly. The greatest strength and persistence of these winds occurs during late winter and early spring. In the summer, when the westerlies are weak, afternoon sea breezes become predominant in coastal areas.

### SUNSHINE

At Tasmania's latitude there is a marked change in day length from summer to winter. In midsummer there can be over 15 hours of bright sunlight (plus an extended twilight), but in midwinter the maximum is only about 9 hours. In practice, cloud, rain and nearby hills will reduce the amount of bright sunshine on most days.

# government

On 1 January 1901, Tasmania with the other Australian colonies of Britain became a federation of six States: the Commonwealth of Australia.

Government in all States is exercised in three jurisdictions: Commonwealth Government, with powers derived from a written constitution and centred in Canberra; State Government, with residual powers (powers not reserved for the Commonwealth), which in Tasmania is centred in Hobart, and local government with authority derived from State Acts and operating in Tasmania in 23 municipalities and six cities.

The Hon. Peter Patmore, MHA

Attorney General,

Minister for Justice and Industrial Relations

The Hon. Judy Jackson, MHA

Minister for Health and Human Services

The Hon. Paula Wriedt, MHA

Minister for Education

The Hon. David Llewellyn, MHA

Minister for Primary Industries, Water and Environment

Minister for Police

Tasmania has a bicameral parliament. The majority party in the House of Assembly (Lower House) forms the government while the Legislative Council (Upper House) is the house of review

# Legislative Council

15 single-member electorates

Term: six years

A periodic cycle of elections applies with either two or three non adjacent electorates going to election each year. Voting for the Council is compulsory. All persons over the age of 18 are eligible to vote provided they have resided in Tasmania for six months; they are Australian citizens, or natural born or naturalised British subjects on the electoral roll at 25 January 1984; and their name is on the electoral roll for a Council division.

Legislative Council members (1 July 1999)

periodic cycle.

House of Assembly 25 members five five-member electorates Term: four years

Tasmania uses the Hare-Clark system (i.e. proportional representation by the single transferable vote) in elections for the Assembly. The legal voting age is 18 years and over. Electors must vote one to seven but can show further preferences if they desire. Voting is compulsory.

A State election held in August 1998 saw the election of 10 Liberals, 14 Labor members and one Tasmanian Green

# LOCAL GOVERNMENT

Local government in Tasmania is administered by the councils of 23 municipalities and 6 cities (Hobart, Launceston, Glenorchy, Devonport, Burnie and Clarence).

They provide services such as garbage and waste disposal facilities, roads and footpaths, drainage, health inspection, parks, recreation facilities, gardens, cemeteries and community centres as well as water supply and sewerage.

# public finance

Government finance statistics provide a measure of the economic impact of the three levels of government (Commonwealth, State and local) on the rest of the economy.

Each level of government's activities are classified as either General Government (GG). Public Trading Enterprise (PTE), or Public Financial Enterprise (PFF). PTFs and PFFs sell goods and services at or close to a market rate. as compared with General Government where goods and services are provided to the public significantly below cost. Examples of well known PTEs include the HEC. TT-Line, and the TAB, while the Motor Accidents Insurance Board (MAIB) and the Tasmanian Public Finance Corporation (Tascorp) are PFEs. Major sources of revenue for General Government include grants and taxes whereas PTEs and PFEs have sales of goods and services, and interest, as their main revenue items.

State Government returned a \$113 million surplus in 1997-98. Net debt also fell from \$2848 million to \$2704 million. A fall in current outlays of \$58 million was partly offset by an increase in capital outlays of \$17 million. Revenue fell during 1997-98 by \$32 million. Of total outlays, the main components were spending on education (22%), interest (18%) and health (17%). Commonwealth grants constituted 53% of State Government revenue, and taxes 28%.

Local government returned a surplus of \$14 million in 1997-98 after a deficit of \$9 million in the previous year. Reduced expenditure on capital projects such as the Hobart Aquatic Centre and the Self's point Treatment Plant upgrade, along with increased rate revenue, contributed to the surplus.

### law and order

Tasmania's laws, legal system and institutions are derived from those of Britain. By Federation in 1901, all Australian States had a legal system firmly based on the Common Law of England. With Federation, Tasmanians also became subject to Commonwealth laws enforced by administratively separate institutions.

### population

Tasmania's estimated resident population at 30 June 1998 was approximately 471,900. This represented 2.5% of the national estimated resident population of 18,751,000.

In the 12 months to 30 June 1998, Tasmania's population decreased by 0.34%, or about 1600 people. At the same time Australia's population increased by 1.22% or 226,800 people. In that year Tasmania had the lowest rate of population growth of all the States.

## Age and sex composition of population

At 30 June 1998, 21.6% of Tasmanians were aged less than 15 years (compared to 20.9% of total Australians); 42.9% between 15 and 44 years, (45.1% of total Australians); 22.3% between 45 and 64 years, (21.8% of total Australians) and 13.2% were aged 65 years or older, (12.2% of total Australians).

The median age of Tasmanians was 35.6 years, an increase of 0.5 years on the 35.1 years recorded at 30 June 1997.

There were 97.2 males for every 100 females, which was slightly less than the total Australian ratio of 99.0 males per 100 females.

Tasmania's population is more evenly spread across the State than the population elsewhere in Australia is spread; almost 59% of Tasmania's population reside outside the capital city statistical division.

In regional terms, 229,590 people or 48.7% of Tasmania's population lived in the Greater Hobart-Southern Region. In the Northern Region there were 133,230 people or 28.2% of Tasmania's population, while 109,060 people or 23.1% lived in the Mersey-Lyell Region.

### labour

In recent years an important change in the Tasmanian labour force has been the shift away from full-time employment, towards part-time employment. In the 1980s, part-time employment accounted for about 19% (approx. 34,000) persons of total employment; during the 1990s this figure increased to around 27% (approx. 53,000 persons). Historically, females have far outnumbered males in part-time employment. In 1998, of the estimated 58,900

#### **FMPI OYMENT**

part-time employed persons, around 74% were females and 26% were males.

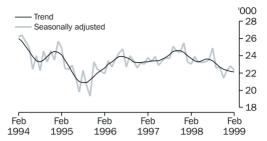

#### Labour market

In 1998, employment in Tasmania was around 196,000 persons. Females accounted for approximately 44% of the total employment, and males 56%. The number of unemployed persons was around 23,000, which converts to and unemployment rate of around 11%. The female unemployment rate was nearly 9% while the male unemployment rate was just under 12%.

#### Industrial disputes, Tasmania<sup>1</sup>

Year	Disputes begun no.	Workers involved <sup>2</sup> '000	Working days lost '000	Working days lost per 1,000 employees
1994	30	5.6	4.6	29
1995	26	3.4	3.5	22
1996	17	10.0	13.0	78
1997	15	2.4	5.7	35
1998	n.y.a.	n.y.a.	3.1	19

The statistics relate to industrial disputes involving stoppages of work for 10 staff-days or more. Figures cover workers who actually participated in disputes plus workers stood down from the establishments where the stoppages occurred but who were not themselves parties to the disputes.

<sup>&</sup>lt;sup>2</sup> This figure is the average of the monthly figures for the respective years.

For explanation of terms and concepts, refer to ABS catalogue number 6203.0.

Figures include additional workers joining disputes of previous periods.

### social welfare

The main objective of the system of social welfare is the alleviation of poverty. The introduction of a pension for aged persons in 1909 began Australia's national provision of social security payments. While it is the Federal Government that provides almost all income maintenance payments, the State Government and voluntary agencies provide many services and personalised help to people in need.

Child care users, March 1996 ('000)<sup>1</sup>

Type of care	Tasmania	Australia
Formal care		
Before and after school care	1.2	111.7

Growing vegetables for human consumption is Tasmania's main cropping activity, concentrated along a coastal strip from Westbury to Circular Head. Four vegetables (french and runner beans, green peas, onions and potatoes) account for about 96% of the total area of vegetables grown. Other major crops, apart from pastures, include barley and oats grown for grain.

#### VALUE OF AGRICULTURAL PRODUCTION

The total gross value of agricultural production in Tasmania increased by 8.6% to \$717.1m in the year ended 31 March 1998. Over the last five seasons, the value of agricultural production has risen by 26.1%.

The value of livestock slaughterings (meat, offal etc.) remained steady at \$117.7m. The value of livestock products (milk, wool, eggs etc.) increased by 5.3% to \$237.8m.

The value of crops in Tasmania rose slightly to \$318.5m. Tasmania's single biggest crop is still potatoes, up \$7.6m to \$92.4m in the year ended 31 March 1998.

An increase in the export price saw the value of the onion crop increase by 67% to \$27.2m.

The value of the apple crop decreased 31.0% to \$37.4m, but still accounted for 79.2% of Tasmania's fruit crop. Grapes are the next most significant fruit, with a value of \$4.2m, up \$1.2m from the 1997 value.

#### **Definitions**

**The value of agricultural production** refers to establishments within the scope of the Agricultural Survey (see page 71).

**Gross value** refers to the value realised in the market place (wholesale price).

Local value deducts the marketing costs.

# forestry

Approximately 50% of Tasmania's land area is covered by forests; 70% of these forests are on Crown land with the remainder being privately owned.

The recent Regional Forest Agreement between the State and Commonwealth governments has established a blueprint for the conservation and productive use of forests in Tasmania over the next 20 years, including increasing the plantation estate over this period.

As part of this agreement, approximately 39% of Tasmania's forests are now in formal and informal reserves.

The wood and paper products industry had the largest industry gross product (\$479.8m) in Tasmania (1996-97), and was Tasmania's third most valuable export commodity earning \$319 million, or 19% of Tasmania's export trade (1997-98).

# energy

The 1993-94 Household Expenditure Survey (HES) estimated that Tasmanian households spent an average \$22.46 a week on household fuel and power (3.6% of average weekly household income), and \$25.56 a week on motor vehicle fuel, lubricants and additives (4.1% of average weekly household income). Tasmania's expenditure was more than the national expenditure figures of \$16.77 a week on household fuel and power and almost the same on motor vehicle fuel, lubricants and additives (\$25.57).
